Re: Request for Assistance

Dear to whom this does concern

Hi, may this letter find you in good spirit's. My name is: Franklin Kinsey, my Id no is 1339224. I am the recent victome of a 8th Amendment violation (medical deliberate indifference) (resulting in serious injury by prison guards) I am a Transgender prisoner whom has been subjected to unfair treatment, PIERA violations, Battery by excessive force, Denied adequate clothing; and I am a seizure patient whom has a active medical by-in for a permaniant "bottom walk restriction/restricted" "not to be allowed on ladders or high places"... Staff was repeatedly told by designee ranking staff, nurses, and myself to not take me up stairs to the top walk. (2nd tier). But Custody Staff members repeatedly refused to listen or adhere to the lay-in's instructions.

On April, 28th, 2022, at 9:40^{pm}-9:45 pm. I was (once again), took up stairs to the 2nd tier for a Shower^{was} I had warned Co. E Efran that I am "Bottom walk Restricted" as he was escorting me... He disregarded me, medical condition, and his job duty to up hold offenders medical lay-ins. I request Aving H.C. 2 wing video as evidence.

Page 2

On April, 25th, 2022 at 10:00 pm - 10:10 pm, as I exited the shower, being escorted by CO. F. Griffin I began feeling exhausted and weak. I had already begun going down stairs when I blacked out... all I remember is waking up down stairs. Then the pain hit. I was hurting in multiple areas (neck, back, both legs, arms, head). Medical was present. I was put on a stretcher and taken to medical Building, immediately.

I was assessed for blood pressure, strength in hands and feet! ~~Left~~ (left) foot weak! I was told by nurses Amy, Trent, Lizz "well I don't see any deformities He can go back" (to housing unit 24/my cell). nurse "Amy Maxwell" and nurse Trent performed the assessment... none of them prescribed a pain reliever (Tylenol, ect.) nor even called the 24 hour doctor to see what he/she might decide, even though I explained to them that I was in excruciating pain...

When the two escorting Officers Cpt. Stewart and CO II Koch attempted to escort me, I tried to stand up but pain shot straight through my foot and leg (left foot and left leg). I couldn't put any pressure on it... I couldn't walk. I told the ~~two~~ guards and rather than report it to the nurses, they came in the medical cell and dragged me ~~at~~ the bed and drag me all the way back to 2 house (a.d. seg)... I was not resisting, nor creating a disturbance of my own free will... I really could not walk! They forced me to hop some of the way because they were dragging me (evilly) (smiling)... This was all video taped.

I request for the Handheld video tape recording of the actual event as evidence. 04/25/22 10:30^{pm} - 11:00 pm

page 3

I have reported to CO. II Hyten the incident on May, 2nd, 2022 whilst returning from participation in my Right to Recreation I was jostled/yanked to a erect stop which causes me to stop hopping and landed on my left foot/leg... the injured leg I report: dislocation, swelling, severe pain, it looks horrid... I immediately fell to the ground... a Code 16 (medical emergency) was called by CO. II Hyten and medical ^{responded} immediately. I was taken to medical immediately... I was x-rayed and found to be suffering from a strained leg tendon (and there is probably more injuries not uncovered). Further evaluation has been recommended.

I was issued an immediate lay-in and a wheel chair. I request the video tape as evidence.

The above stemmed from Southeast Correctional Center's Custody Staff Officer Guards refusing to keep me safe, (because I am a "Prad & Load" and a Color Trans-woman) and 3 nurses not following the appropriate protocol in this situation. By the Custody Staff deliberate indifference to my medical condition (Seizures) and medical lay-in warning them of the dangers they will be putting me in by doing so. (obvious fact: The Custody Staff was and is trained, extensively, to follow the medical lay-in's do to such instances/spontaneous occurrences may happen at of nowhere... Seizures occur spontaneously with little to no fore warning at all)... (Staff is trained not to take this fact for granted). But for months (plural) that is exactly what housing unit 2 night shift crew has been doing. On the 7pm to 7am shift) It is the male-staff member and administrative staff have been made fully aware of their conduct at Chase to "turn a Blind Eye" and Brashly (robotically) respond to my dangers so that the danger never reached

page 4 Now they cannot pretend to be blind, but I fear they will take actions to edit reports and video in order to elude accountability. See Case Lawrence v Bowersox 297 F.3d 727.

I'm reaching out in hopes to receive
Legal representation / Council

Thank you for your time and patience
please respond
